

Welcome to the First Edition of the RSB Global Newsletter!

It gives me immense pleasure to introduce the very first edition of the RSB Global newsletter, a platform created to bring together the stories, achievements, people, and progress that continue to shape our organisation every day.

As RSB continues to evolve as a global engineering and mobility solutions provider, this newsletter marks an important step toward strengthening communication and connection across our teams, plants, partners, and stakeholders. It is not just a collection of updates, but a reflection of who we are as an organisation, our values, our culture, our innovations, and our shared aspirations for the future.

The beginning of 2026 has already demonstrated the strength and momentum of our teams across locations. From advancements in engineering and operations to meaningful CSR initiatives, customer engagement, and people-centric celebrations, each milestone reflects the collective effort and commitment of the RSB family.

What makes RSB truly special is the balance we continue to maintain between technology and people, performance and responsibility, growth and culture. As industries transform and new opportunities emerge, our ability to adapt, collaborate, and innovate together will remain our greatest strength.

This newsletter has been envisioned as a space to celebrate these efforts to showcase achievements, share inspiring stories, and recognise the individuals and teams contributing to RSB's journey.

As we launch this first edition, I would like to thank every employee, partner, and

stakeholder who continues to contribute toward building a stronger and future-ready RSB.

I hope this newsletter becomes a meaningful platform that informs, inspires, and connects all of us as we move forward together.

“Every milestone begins with a shared vision, and this newsletter marks the beginning of a new chapter in the RSB journey.”

- Nirmala Behera
Executive Director
(Group HR & Branding, RSB Global)

Building with Purpose. Leading with Responsibility.

Growth is meaningful only when it is built on values, capability, and long-term vision.

At RSB Global, leadership has always been guided by a clear and consistent philosophy to build not just a successful enterprise, but **a sustainable, value-driven institution.**

From its early beginnings to becoming a global engineering organisation, the journey of RSB has been shaped by resilience, discipline, and an unwavering belief that progress must be purposeful. Inspired by the principles of visionary industrial leadership, the organisation continues to uphold a culture rooted in integrity, excellence, and long-term thinking.

Today, as the industry undergoes rapid transformation - driven by electrification, evolving technologies, and shifting global dynamics - our focus remains balanced. While we actively invest in future-ready solutions such as advanced drive train systems and electric mobility, we remain equally committed to strengthening our core capabilities in manufacturing and engineering.

Our growth is not defined by expansion alone, but by how effectively we integrate **technology, processes, and people** across all levels of the organisation. The alignment between our global operations, engineering expertise, and workforce enables us to deliver consistent value to our customers and stakeholders.

What continues to differentiate RSB is its people, their commitment, adaptability, and shared sense of ownership. It is this collective strength that allows us to navigate challenges, seize opportunities, and move forward with confidence.

As we look ahead, our direction remains clear - To build scale with stability, innovation with responsibility, and growth with purpose.

At RSB, leadership is not just about direction; it is about building an institution that endures.

- RK Behera and SK Behera

Recognition Driven by Process Excellence

**Quality is not
inspected.
It is engineered.**

RSB's commitment to quality and continuous improvement was reaffirmed through a significant achievement this quarter, as the Unit-2 team secured the **1st Runners-Up position at the 38th CII State QC Circle Competition.**

This recognition is not just an award; it reflects the depth of operational discipline embedded across RSB's manufacturing ecosystem. Competing on a platform that evaluates problem-solving methodologies, process improvements, and quality control practices, the team demonstrated strong analytical capabilities and excellence in execution.

At RSB, quality is not treated as a checkpoint at the end of production. It is integrated into every stage from process design and manufacturing to validation and delivery. Initiatives such

as Quality Circles play a critical role in driving grassroots innovation, empowering teams to identify challenges, implement solutions, and enhance overall efficiency.

THIS ACHIEVEMENT HIGHLIGHTS

Strong shop floor engagement in continuous improvement.

Structured problem-solving using quality tools.

Alignment with global manufacturing standards

A culture where excellence is consistently pursued.

As RSB continues to scale its operations, such recognitions reinforce the organisation's focus on building **robust, quality-driven systems that deliver consistent performance.**

Precision at Scale. Excellence in Execution.

During the first quarter of 2026, RSB Global continued to strengthen its manufacturing backbone, reinforcing its

position as a **reliable, high-precision engineering partner** to global OEMs.

With a well-established network of manufacturing facilities, operations during the quarter were driven by a clear focus on **process stability, productivity,**

and quality consistency.

The integration of advanced manufacturing technologies - including **robotic welding, precision machining, and automated assembly systems** -

enabled improved cycle time while maintaining stringent quality standards.

A key priority during this period was the **deepening of lean manufacturing practices**, with teams actively working on waste reduction, process optimization, and improved resource utilization. These initiatives contributed to better throughput, reduced variability, and enhanced operational efficiency across plants.

At the same time, RSB continued to strengthen its **quality-first approach**, ensuring alignment with global OEM requirements. From in-process checks to final validation, quality systems remained embedded across every stage of production - reinforcing reliability and performance in end applications.

Another important area of focus was **digital integration within operations**. The use of real-time monitoring and performance tracking systems enabled quicker decision-making, improved visibility across processes, and more effective control over production parameters.

Beyond efficiency and output, equal emphasis was placed on **safety and sustainability**. Continuous efforts were made to enhance workplace safety standards, optimise energy consumption, and ensure

environmentally responsible operations across facilities.

This balanced approach - combining **technology, process discipline, and people capability** - allows RSB to seamlessly support both **high-volume manufacturing and application-specific engineering requirements**.

Application-specific engineering requirements.

More importantly, it positions RSB's plants not just as production centres, but as **integrated, future-ready manufacturing ecosystems** capable of supporting the evolving demands of the mobility and industrial sectors.

At RSB, operational excellence is engineered into every process, every system, and every outcome.

Building Stronger Teams, Beyond the Workplace

Collaboration is not created in meetings
- it is built through shared experiences.

At RSB Global, organisational strength is driven not only by engineering capabilities and operational systems, but by the cohesion, engagement, and collective energy of its people.

The **Annual Sports Month at RSB Unit-3, Jamshedpur**, stands as a reflection of this belief - transforming the workplace into a dynamic environment of participation, collaboration, and shared achievement.

What makes such initiatives significant is not just the activity itself, but the underlying impact it creates across teams and functions.

Creating a Culture of Collaboration

Employees from diverse departments stepped beyond their functional roles, engaging in activities that encouraged interaction beyond structured workflows.

This helped:

- 1) Strengthen cross-functional relationships
- 2) Break down hierarchical and departmental barriers
- 3) Foster open communication and team alignment

Balancing Strategy and Energy

The event brought together a mix of mental and physical engagement, reinforcing well-rounded participation:

- 1) Strategic indoor games like **Chess and Carrom**, highlighting analytical

thinking and focus

- 2) High-energy outdoor sports, emphasising agility, coordination, and teamwork

This balance mirrors RSB's work culture, where **precision thinking meets execution excellence**.

Driving Engagement Beyond Routine. In high-performance environments, sustained engagement is critical. Initiatives like Sports Month play a key role in:

- 1) Re-energising teams beyond daily operational demands.
- 2) Encouraging participation across all levels of the organisation.
- 3) Creating moments of recognition, celebration, and shared success.

Reinforcing Core Cultural Values

The spirit of sportsmanship observed throughout the event reflects deeper organizational values:

- 1) Mutual respect and inclusivity.
- 2) Healthy competition with collective growth.
- 3) Ownership and team accountability.

These are the same values that translate into performance on the shopfloor and across business functions.

From Engagement to Organisational Strength

While such initiatives may appear recreational, their impact extends far beyond:

- 1) Improved team cohesion
- 2) Higher employee morale and motivation
- 3) Stronger alignment with organisational goals

At scale, these factors directly contribute to **operational efficiency, innovation, and long-term performance**.

At RSB, strong systems are built by stronger teams - and stronger teams are built through shared experiences.

एक पहल

Ek Pahal - An Initiative by RSB

Empowering Women.

Recognising the contribution of women who continue to shape our culture, teams, and future.

International Women's Day 2026 was celebrated across multiple RSB Global locations with a shared spirit of appreciation, inclusion, and collective pride. From Jamshedpur, Pantnagar, Chennai, and Sricity to Fulgaon, Lucknow, Orissa, Pune

Corporate Office, and iDesign, teams came together to recognise the invaluable contribution of women across the organisation.

What made this celebration meaningful was its scale and participation across plants, offices, and functions - reflecting how inclusivity is deeply embedded in RSB's culture rather than limited to a

single event or initiative.

The celebrations created spaces for interaction, recognition, and engagement, bringing together employees from diverse teams and backgrounds. Through cultural activities, team interactions, appreciation moments, and shared experiences, the occasion highlighted the growing role of

Strengthening RSB.

Across locations, the energy and participation reflected a workplace culture that values:

- 1) **Equal opportunity and respect**
- 2) **Collaboration across teams and functions**
- 3) **Recognition of contribution beyond roles and hierarchies**
- 4) **Building an inclusive and future-ready workforce**

women across engineering, operations, design, corporate functions, and leadership environments within RSB.

More importantly, the initiative reinforced a larger organisational mindset - one that believes diverse perspectives strengthen innovation, collaboration, and long-term growth.

As RSB continues to evolve as a global engineering organisation, strengthening diversity and creating inclusive work environments remains an important part of its people philosophy.

The Women's Day celebrations across locations were not just moments of appreciation - they were a reflection of the culture RSB continues to build every day.

Taking Healthcare to the Last Mile

Impact is meaningful only when it reaches those who need it the most.

At RSB Foundation, social responsibility is not approached as an obligation but as a commitment to create measurable, on-ground impact.

On the occasion of **World Cancer Day**, a significant step was taken toward improving healthcare accessibility with the launch of a **Mobile Cancer Screening Unit**, extending critical diagnostic services directly to underserved rural communities.

This initiative reflects a deep understanding of one of the most pressing healthcare challenges

Early detection is critical, but access remains limited.

Bridging the Accessibility Gap

In many rural regions, timely medical intervention is often hindered by:

- 1) Limited availability of diagnostic infrastructure
- 2) Geographic barriers restricting access to hospitals
- 3) Lack of awareness around preventive healthcare

The mobile screening unit addresses these challenges by **bringing healthcare directly to**

communities, ensuring that distance and infrastructure are no longer barriers to early diagnosis.

Comprehensive Screening Capabilities

The initiative is designed to deliver multi-dimensional diagnostic support, including:

- 1) **Digital mammography for breast cancer detection**
- 2) **Cervical cancer screening (Pap smear tests)**
- 3) **Oral cancer screening** is particularly critical in high-risk regions

This integrated approach ensures **early-stage identification**, significantly improving treatment outcomes.

Collaborative Impact Model

The program has been implemented in collaboration with leading institutions, reinforcing its scale and effectiveness:

- 1) Rotary Club
- 2) Tata Steel Foundation
- 3) Meherbai Tata Memorial Hospital

This partnership-driven model enables the initiative to combine **medical expertise, operational reach, and community engagement.**

Designed for Real-World Conditions

Unlike static healthcare infrastructure, the mobile unit is:

- 1) Built for **rural terrain and accessibility challenges**
- 2) Equipped to operate in **remote and underserved locations**
- 3) Focused on **delivering consistent and reliable screening services**

This ensures that the initiative is not just symbolic but **functionally impactful.**

Driving Awareness Alongside Action
Beyond diagnostics, the initiative also plays a crucial role in:

- 1) Spreading awareness about early detection.
- 2) Encouraging preventive healthcare practices.
- 3) Educating communities on timely medical intervention.

Because awareness is often the first step toward saving lives.

Embedding ESG into Action

This initiative reflects RSB's broader ESG philosophy:

- 1) Social Impact:** Improving community health outcomes.
- 2) Accessibility:** Making healthcare inclusive and reachable.
- 3) Responsibility:** Aligning business growth with societal contribution.

It reinforces the belief that sustainable organisations are built not only through business performance, but through **meaningful contributions to society**.

At RSB, progress is measured not just in growth, but in the lives we are able to impact.

Strengthening Relationships. Expanding Horizons.

The first quarter of 2026 marked a decisive phase in RSB Global's journey toward becoming a **future-ready, globally integrated mobility solutions provider**.

What stood out during this period was not just activity but **intentional market positioning**.

Driving Visibility Through Strategic Customer Engagement

RSB actively strengthened its presence across key OEM ecosystems by participating in high-impact industry platforms.

A notable highlight was its **technology showcase at Ashok Leyland Tech Day 2026**, where RSB presented next-generation systems focused on efficiency, intelligent mobility, and sustainability.

This engagement was more than a showcase—it was a reaffirmation of RSB's evolving role from a component supplier to a **solution-driven engineering partner**, aligned with the future of commercial mobility.

Expanding Market Relevance in a Transforming Industry

The automotive and mobility landscape is undergoing rapid transformation—driven by electrification, global supply chain shifts, and changing customer expectations.

RSB's approach during this quarter reflected a clear strategic direction:

- 1) Strengthening its **presence across commercial vehicle, passenger vehicle, and off-highway segments**
- 2) Advancing capabilities in **EV systems, e-axles, and next-gen drivetrain technologies**
- 3) Aligning product development with **global customer requirements and future mobility trends**

This positions RSB not just as a participant, but as a **key contributor in the evolving mobility ecosystem**.

Global Footprint, Local Impact

With an established presence across **India, the United States, and Mexico**, RSB continued to leverage its global manufacturing and customer network to enhance responsiveness and scalability.

The organisation's strategic focus remains clear:

- 1) Build closer proximity to customers
- 2) Strengthen regional manufacturing ecosystems
- 3) Enable faster delivery and localised solutions

This distributed global model allows RSB to serve diverse markets while maintaining consistency in quality, engineering precision, and delivery excellence.

Strengthening the Aftermarket Opportunity

A key shift observed in this period is RSB's growing emphasis on the **aftermarket segment**, an area with significant long-term potential.

Having established strong credibility with OEMs over decades, RSB is now extending that trust into:

- 1) Service networks
- 2) Fleet operators
- 3) Independent distribution channels

The objective is clear:

to transform the aftermarket from a supporting function into a **strategic growth driver** in the coming years.

Quality as a Market Differentiator

Recognition at platforms such as the **CII State QC Circle Competition** during this quarter reinforces a core truth about RSB:

- 1) Market presence is not built only through expansion, it is sustained through consistent quality and engineering discipline.
- 2) This commitment continues to strengthen customer confidence and long-term partnerships across segments.

The quarter reflects a strong alignment between **market strategy, customer engagement, and future readiness**.

Engineering at RSB goes beyond building Products- it's about shaping the future of mobility.

At RSB, engineering is not confined to product development; it is a continuous process of anticipating change, adapting technologies, and building solutions that remain relevant in the future of mobility.

The global commercial vehicle industry is undergoing a significant transformation. Increasing emphasis on efficiency, sustainability, and intelligent systems is reshaping how vehicles are designed, powered, and operated. In this evolving landscape, RSB is actively aligning its engineering capabilities to deliver solutions that go beyond conventional mechanical systems.

Our innovation approach is rooted in the integration of **intelligent engineering and sustainable design principles**. From advanced

drivetrain technologies to next-generation electric mobility solutions, RSB is working towards creating systems that are not only efficient but also future-ready.

A key focus area has been the development of **integrated mobility solutions**, where traditional components evolve into intelligent systems. This includes advancements in:

- 1) **Electrified drivetrain architectures such as e-axes and EV reducers**
- 2) **System-level engineering that enhances vehicle efficiency and performance**
- 3) **Design optimisation for durability under demanding commercial applications**
- 4) **Integration of smarter, more adaptive technologies into core engineering systems**

This transition reflects a larger shift from being a component manufacturer to becoming a **technology-driven mobility solutions provider**.

In line with global trends, sustainability has also become a central element of RSB's engineering philosophy. Efforts are being directed toward reducing system weight, improving energy efficiency, and supporting the transition toward cleaner mobility solutions.

The recent showcase of our innovations, highlighting intelligent systems and sustainable engineering, reinforces RSB's commitment to leading this transformation.

What sets RSB apart is its ability to combine **decades of mechanical engineering expertise with forward-looking innovation**, ensuring continuity while embracing change.

As the industry moves toward electrification and smarter mobility ecosystems, RSB is not just participating in the transition, it is actively engineering it.

Calling all 'RSB Parivar'! We are thrilled to invite you to the latest RSB Connect Challenge-a high-stakes quiz designed to test your precision and speed. This is your opportunity to showcase your expertise and compete with fellow members.

We are looking for the best of the best, so bring your A-game, act fast, and secure your spot among our top performers. Your path to winning starts right here!

Winners will get
**Amazon Gift
Voucher**

IND - 2000/-

Participation Guidelines:

Accuracy First: Ensure all personal details are submitted accurately via the Quiz form.

Deadlines Matter: Only submissions received within the designated time frame will qualify for the prize.

Seamless Access: (Mobile Users) Simply scan the QR code to launch the quiz.
(Desktop Users) Use the provided link for immediate access from your workstation.
